1 December 1958

MEMORANDUM FOR THE RECORD

SUBJECT: Canning Equipment Safeguard Units

1. On 26 November 1958, the undersigned packaged 15 Equipment Safeguard Units in 6 1/4" X 6 3/4" reuseable drums with removable heads. The work was done at Ft. Belvoir Testing Grounds. The units were wrapped in enough cushioning material to give a snug fit inside the drum and a 4 unit package of dessicant was included.

2. The units were canned at 55°F, then the sealed drum was put in 150°F water to check for leaks. Only one leaked, however, this was remedied by tightening the clamp on the head.

3. The canned units will be stored in an Ordnance magazine at Ft. Belvoir, Virginia.
